ABOUT ME

Software engineer with hands-on experience in Golang and JavaScript, specializing in backend services and microservices-based architectures. Skilled in building cloud-native applications, DevOps tooling, and internal platforms that drive business value. Strong interest in decentralized technology with prior Web3 development experience.

SKILLS

- Languages: Golang, JavaScript, TypeScript, Solidity, Rust, Java
 - Frameworks / Libraries: Go Kratos, Node.js, NestJS, React, Refine, Web3.js, Ethers.js
 - APIs & Protocols: REST APIs, gRPC, Protobuf
 - Cloud & DevOps: Google Cloud Platform (Cloud Run, Cloud Storage, Pub/Sub), Docker, Kubernetes, GitHub Workflow
 - Databases: MongoDB, MySQL
-

WORK EXPERIENCE

Kasikorn X | 2022 - present

Venture Architect (Software Engineer)

Coral – Digital Collectible Platform

- Develop and maintain microservices and internal tooling to support feature delivery and operational workflows for a large-scale digital collectible ecosystem
- Built back-office tools enabling content and application entity management, improving operational throughput for admin teams
- Developed backend service for reward and loyalty features, enhancing customer engagement and retention
- Extended and maintained core collectible and event services to support new campaigns and business initiatives
- Enhanced KYC service with ID card chip verification capabilities to improve identity validation and compliance

Six network | 2020 - 2022

Software Engineer

Definix – Web3 / DeFi Applications

- Developed Solidity smart contracts using Truffle, ensuring secure and reliable decentralized application functionality
 - Designed and delivered RESTful APIs for on-chain data interaction to improve user experience and system performance
 - Built internal monitoring and administrative tools for smart contract management and on-chain activity visibility
 - Implemented a cross-chain token bridge feature enabling seamless asset transfer across blockchain networks
-

ADDITIONAL EXPERIENCE

Kajaani University of Applied Sciences (KAMK) | 2019 - 2019

Game Developer (Intern)

Game Development (Unreal/Unity)

- Develop minis 3d puzzle game, work on basic Unity's physic
 - Join mini mmo rpg project, work on Unity path finding system to improve npc behavior
 - Participate in game jam event, create mini 2d interactive game and published it on itch.io
-

EDUCATION

Kasetsart University | 2016-2019

Bachelor of Software and Knowledge Engineering
